No currency is **safe** from **Inflation!**

Fiat Paper Currencies are simply paper and thus perishable

In the news all we hear is: Economic crisis, Financial crisis, National debts, deficits, failing banks, and now failing countries. The response by major Central Banks is to print more fiat currencies in an attempt to stimulate failing economies.

Our currencies are being devalued due to the enormous amount of "paper" and "digital" currency created out of thin air and injected into the financial

systems, outpacing the production of goods and services thus creating worldwide price Inflation at an alarming rate. As consumers we are experiencing this daily in the supermarket, in the movie theater and at the gas station. Eventually, as the confidence in fiat currencies erodes, and people begin to trade their worthless paper for tangible assets, hyperInflation will ensue. The most prominent and fearsome example of hyperInflation was

post WWI Germany, where in January 1919, one ounce of Gold traded for 170 marks; by November 1923, that same ounce was worth 87 trillion Marks.

When **Gold** talks, the world is silent!

Gold: Stability and Safety for your future!

Gold is a precious metal worthy of respect in its role, significance, and influence as it plays to many facets of governments, business, and everyday life. It has always been an invaluable and integral part of sound or solid financial portfolios.

Gold is commonly suggested by many licensed financial experts as a hedge against rising Inflation. Gold protects your assets from Inflation as prices for products and services increase and your paper money devalues. Gold is not bound as a promise to pay out by a bank or a government.

The precious metal has been a universally accepted means of payment for thousands of years. It is Timeless and never rusts, rots, tears, diminishes nor needs maintenance or replacement.

It is an asset that offers true generational wealth. Strong currencies, like the Euro, and Dollar have lost their buying power, but Gold has once again proven to be a safe haven. Governments have stocked up on Gold reserves to stabilize their respective paper currencies. Due to its multifaceted price interaction, Gold has once again proven to be a

store of value and a strong hedge against Inflation. Gold as Savings provides a long-term effective means of protection against financial crisis and is regarded by banks as true collateral.

If a deeper Recession or Depression should occur, paper money will not necessarily be accepted by everyone. Karatbars in small gram weights offers the best flexibility if this should occur.

Gold is **Legendary**

Generation to Generation, Gold has secured the wealth of the World

Gold is one of the most valuable and most sought after metals of the financial elite. The shiny yellow color, the stability, the applications and the rarity make Gold indispensable. Even thousands

of years ago these extraordinary properties made Gold an object of desire. Not only does Gold stand for security, it is a symbol of status, influence and wealth. As the natural Gold reserves are lim-

ited worldwide, the demand for Gold continually grows. So act now and secure your assets with Gold.

The ever **growing demand** of Gold guaranties a **continuous growth** of value

Inflation cannot affect the persistent lasting value of Gold

The ever growing demand and time-tested value of Gold ensures a safe, secure and guaranteed growth option. An ounce of Gold 100 years ago would buy the same amount of products and services it does today, if not more. In the early 1900's Gold sold for \$35

per ounce. Which would you rather have in your savings vault today? An ounce of Gold or \$35 ??? Doesn't it just make sense to protect your wealth with Gold? Gold is exempt from the negative effects of Inflation. It is experiencing an historic supply and demand ratio re-

sulting in a continual growth in value. This precious metal is utilized as: a means of payment; investment; protection from Inflation; and is a core component in advancing technological developments - all simultaneously raising the demand.

Gold is the strongest currency of the world and the only currency that cannot be falsified.

Some interesting and relevant facts:

- Annual world Gold requirements (demand) is estimated at 3500 metric tons of Gold while supply mined is about 2500 metric tons
- World-wide Gold reserves estimated weight is about 45.300 metric tons
- If we continue to mine Gold at the current rate, Gold reserves will be exhausted in 27 years
- All Gold mined to this day will fit into a cube with a side length of 65 feet
- This cube would fit under the Eiffel Tower with ease
- Gold is the strongest currency of the world and the only one that cannot be falsified.

1900

20 Reichsmark = **7g Gold** = 100 loaves of bread

2010

20 Reichsmark = **7g Gold** = 250 Euro = 100 loaves of bread

Gold is a symbol for **immortality**

People insure their homes, their lives and their vehicles. Karatbars International offers a fast and easy way to insure your finances. In the event of a recession or depression, financial crisis, and/or a currency crisis, paper money may not be accepted by anyone.

Financial experts are now advising their clients to protect their assets with Gold to provide stability for you, your family and your future. At the end of the day, it's not how much you make, it's how much you keep that counts. Our goal, at Karatbars International, is to provide everyone on the planet safety, security and a means to exchange fiat paper money into Gold. Karatbars International specializes in the trade, safe storage or delivery of physical Gold in smaller, more affordable, transaction friendly weights which provide

the perfect solution in times of financial crisis or unrest. We offer unique products in addition to our flagship Karatbars (One-Gram-Gold-Cards), such as our custom branded Gold cards and collector Gold cards.

With our innovative products and unsurpassed business model, we are currently open for business in 70 plus countries with the aspirations of operating in 194 countries in the very near future. The goal of our company is to provide a solution to create financial security and a hedge against the falling purchasing power of the world's fiat paper currencies, with 24 Karat 999.9 Gold. Gold is an accepted means of payment all throughout the world, thus making it a very important part of your financial future. In times of political and financial crisis, Karatbars account holders can create a hedge against

Inflation and currency devaluation by simply exchanging paper money into Gold money. This is done through our online or offline exchange system. Exchanging paper money from your left pocket into Gold money in your right pocket makes more and more sense in this ever changing world economy.

Karatbars may be stored, sold or exchanged for products and services across the globe. Unlike paper money, Gold has a history of value and performance for thousands of years. Paper money comes and goes. Gold, and in our case, Gold money in affordable 1 gram weights of 24 Karat 999.9 purity is the solution for the worlds fallen fiat currency system. Karatbars are produced and made available to Karatbars customers and affiliates by ATAKulche Refinery which is on the LBMA Good Delivery List.

The **foundation** of our world's economy is **Gold**

Protect your assets with Gold and provide stability for you and future
